## Education / Work experience timeline

### Focused on research & development

- constantly learning new development concepts, algorithms, design patterns and ... I am looking forward for next big challenge in your company!

Present

### Obtained Master's degree (Ing.) in Informatics

Diploma thesis: Integration of Applications and Services for Monitoring of Student's Progress in Case Studies

June 2013

### iOS Developer

June 2013

- in parallel with Perform webdev project I accepted challenge to do updates of 2 iOS apps for Harrods and Liverpool football club (LFC Tracker) in my free time.
- with minimal skills in iOS development I was able to fully cover both apps and successfully deliver them to App Store within 2 months.

### Experienced Web developer at Perform

January 2012 - Present

- analysis, architecture, development and maintenance of websites and applications for many Perform clients
  - creating automated unit and integration tests
  - working with modern web technologies
  - focusing on optimisation of websites for mobile phones including responsive layouts and html5 features
  - working in the Scrum team
  - Scrum Master role
  - leading the development team of 4 people and 2 testers
- analysing requirements and proposing new solutions
- working close with project managers and architects.
  - using mainly following technologies: JavaScript (frameworks/libraries: BackboneJS, jQuery, PhantomJS, CasperJS), XML, json, CSS(2,3), HTML(4,5), Freemarker, XSLT.
- projects: <http://www.feitv.org> | <http://www.tv.manutd.com> | <http://www.ecbtv.com> | <http://www.fedcup.tv> | <http://www.daviscup.tv> | HTML5 player which is used on many Perform sites.

### Junior Java Developer at Navteq project

June 2011

- due to great coding skills in automation tests I was moved to developer position within the same project
- responsible for development, maintenance and testing of SOAP services focused on authentication and authorization
- participated in software product definition and analysis
- working close with testers in the Scrum team where I tried also Scrum Master role
- using mainly following technologies: Java EE, SQL, PL/SQL, Hibernate, Spring

### Obtained Bachelor's degree (Bc.) in Informatics

Bachelor thesis: Graphics editor in JAVA language

June 2011

### Junior software tester at Navteq project

January 2011

- White/Black box and regression testing of SOAP services with using SoapUI tool
- coding of automation tests in Groovy script
- working close with developers in the Scrum team.

### Started working at NESS KDC, s.r.o.

Before working on projects, I attended 3 months of various technical courses which prepared me for work.

October 2010

### Started studying at the Technical University of Košice Faculty of Electrical Engineering and Informatics

September 2008

Obtained Graduation in Graphic systems at Secondary Technical School of Engineering in Spišská Nová Ves

June 2008

1989

Born
